Summary

Opening Context (150 chars):

"The President Is Missing" is a gripping political thriller co-written by James Patterson and former President Bill Clinton. It drops readers into a terrifying scenario: the U.S. President vanishes, and the nation spirals into chaos.

Main Content (400 chars):

President Jonathan Lincoln Duncan disappears right before a critical cybersecurity summit. He's not kidnapped—he's hunting a digital terrorist group called Sulphur, which threatens to unleash a devastating cyberattack on America's infrastructure. Duncan, a former Navy SEAL, goes off-grid with only his Secret Service agent, Carolyn Brock, and a mysterious ally. The plot weaves through D.C. power plays, a rogue vice president, and a mole in the White House. Themes of loyalty, sacrifice, and the ethics of surveillance dominate. Duncan's chronic illness (a rare blood disease) adds personal stakes, forcing him to race against time while hiding his weakness.
